

# Role Profile: CAD Technician

## Details

Salary: £ Competitive (Temp. contract could develop into full time for right candidate)  
Hours: 37.5 (Mon-Thu 8am to 5pm, Fri 8.30am to 12 noon)  
Location: S71 Barnsley  
Closing date: Immediate start available

To assist with a number of projects we're looking for a someone to develop 3d models to precise specifications in Dassault Solidworks. You'll work from plans provided by engineers and will also be required to measure and model various parts of machinery and installation zones at our customer's sites to provide clear and accurate spaces for our designers to propose. You'll also have proven experience of creating drawings specifically for manufacturing assembly.

## Responsibilities

- Create 3d models to precise accuracy
- Measure and record details on and offsite to bring together as plans
- Liaise with the wider team and produce versions of drawings to their requirements
- Provide quality output to assist in the production of automated machines
- Modification of drawings based on feedback from engineers and technicians
- Comply with and participate in our Quality Systems

## About SMS Machine Automation

Just 10 minutes from Barnsley town centre, our business can be easily commuted to from Sheffield, Leeds, Wakefield and Pontefract. We service customers with automated solutions across a wide range of industries, from food to nuclear fuel, automotive to construction, providing automated solutions usually with electric automation or robotics. With almost 20 years in the business we know that to stand still is to go backwards so you'll be joining a progressive company with ample scope for picking up new skills.

## Next Steps

Applications are invited from candidates with a good working knowledge of Solidworks, must be good mathematically as accuracy is everything in this role.

To apply, please post or email a CV and covering note to our address below.
